**Unwire Oregon:
Forging a New Economic Development Consensus**

Corvallis, OR- May 1, 2007- One Economy Corporation, a multi national non-profit and Oregon State University have formed a strategic partnership to bring national leaders from the technology sector as well as Oregon civic and economic development representatives to Oregon's technology summit, *Unwire Oregon*, www.unwireoregon.com. On May 1st, at Oregon State University, Ron Resnick, President and Chair of the WiMAX™ Forum, Chris Sacca, head of Special Initiatives for Google, and Rey Ramsey, One Economy's President and founder will address audience members at Unwire Oregon.

"Unwire Oregon is a unique opportunity to bring thought leaders together to explore how we can blend technology and policy to make a difference." Said Curt Pederson, Oregon State University's Vice Provost and CIO.

Unwire Oregon, will engage people inside and outside the realm of technology and call attention to its potential and relevance within Oregon's economy. How does change in technology trends transform our businesses and our economic development strategies? How do we keep Oregon on the leading edge of this change? These issues and many more will be addressed by executives from Google, Tropos Networks, Intel, WiMAX Forum®, M2Z Networks as well as Oregon State legislators and policy makers. The Opening Key Note presentation will be from the President and Chair of WiMAX Forum®, Ron Resnick. Google's Chris Sacca, and One Economy's President and founder, Rey Ramsey, will be the featured summit speakers.

"Unwire Oregon offers a unique opportunity for Oregon leaders to gain a much deeper understanding of the promise that wireless broadband offers," said Ron Resnick, President and Chair of the WiMAX Forum®. "Mass adoption of wireless broadband will profoundly change the way we access the Internet and change what we do with it. I am pleased to take part in an event that serves as a platform to explore these opportunities and how Oregon can take the lead on this front for economic success."

Unwire Oregon's goal is to help initiate action that leads to state, regional and local technology infrastructure and applications that improve our citizen's opportunities to build business, social and personal capital, and prepare them to participate in the digital society. The summit will take place on Tuesday, May 1st from 10:30am to 3:30pm located at Oregon State University, LaSells Stewart Center.

About One Economy Corporation

One Economy Corporation is a multi-national nonprofit founded in 2000 that uses technology-based strategies to help low income people improve their lives and join the economic mainstream. One Economy's two prong strategy brings broadband into the home along with online content through their award winning, multi-lingual consumer website the Beehive (www.beehive.org). Through its Bring IT Home campaign, One Economy has helped bring broadband into the homes of 200,000 low-income people. To date nearly nine million individuals have used the Beehive. One Economy recently launched a campaign to expand these online offerings by creating the Public Internet Channel. For more information: www.one-economy.com.
